

SMART Notebook SE software

At last, educational software tailor-made for today's generation of technology-savvy students.

SMART Notebook SE (Student Edition) is interactive learning software that helps students complete school work, take notes, manage due dates and organize digital material. And students can do it all in the visual, free-form style they find most comfortable. Students have multiple ways of searching for and accessing files, and they can work on several documents at the same time and quickly switch between tasks. With the portable bracelet version of SMART Notebook SE, students are able to use the software on any computer or mobile device, bringing their work with them everywhere they go.

SMART Notebook SE offers the same creative tools and features as SMART Notebook software, which is widely used by teachers around the world to create and deliver interactive lessons. And, because both applications complement each other, it's easy for teachers to share lesson notes and SMART Notebook files with students.

Makes learning more personal

With SMART Notebook SE, students can put their own stamp on learning. They can customize their home page with images and information, and keep track of their schedules and deadlines. Teachers are able to personalize learning by sharing their SMART Notebook-created lesson materials with students and providing them with supplementary files that support their individual learning styles.

Lets student creativity shine

The software offers students the flexibility to express their creativity in whatever way they find most comfortable. Students can create their own multimedia material and use it to complete assignments and prepare class presentations. Using the Tabs feature, students can access content creation tools in a variety of ways and can move simultaneously through multiple files. They can also take notes and annotate over digital lesson material. Students even have access to the tools, features and Gallery content in SMART Notebook software.

Helps students organize with ease

SMART Notebook SE automatically saves files and stores them in one location, helping students work more efficiently and keep organized. The Flags feature allows students to highlight important information with color codes so they can easily access material whenever they need it. Students can also quickly search for information by subject, keyword and due date, or by using keywords displayed in a Web 2.0 tag cloud.

Allows students to learn anywhere

Students can experience the benefits of SMART Notebook SE software wherever learning happens – whether it's in the classroom, at the library or at home. The software can be downloaded directly to a PC or other computing device and is also available on the SMART Notebook SE bracelet. The bracelet allows students to use the software in any location. The software is preloaded on the bracelet and runs automatically when students plug it into any computer. Students can complete their homework or assignments anywhere, save their work to a single USB key, and then bring it to class to present or hand in.

- 1 My Home** – It's easy to give home pages a personal touch
- 2 My Binder** – Students can keep everything organized
- 3 Design templates** – Ready-made templates help students prepare assignments

Features

Personalize

- **My Home** – Allows students to personalize SMART Notebook SE software with their own photos, images and information. They can create their own from scratch or use a template.
- **Personal tutoring service** – Gives students 50 free minutes of tutoring time with Tutor.com, a homework and tutoring service that is accessible anytime.

Create

- **SMART Notebook tools** – Offers students all the creative potential of award-winning SMART Notebook software.
- **Design templates** – Enables students to save time by providing them with easily-customized, ready-made templates for homework and assignments. These ready-made templates offer a variety of useful designs such as science projects and book reports.
- **ScratchPad** – Allows students to quickly make notes anytime. A ScratchPad page is open and ready for use all the time. The pages are automatically stamped with a date so they can be easily located.
- **Tabs** – Helps students move content from one document to another in any order they choose. Students can use the tabs to quickly drag and drop objects into documents and add pages to files.

Organize

- **My Binder** – Allows students to organize schedules, assignments and to-do lists based on tags they assign to their SMART Notebook SE files.
- **Tag cloud** – Helps students quickly locate files through keywords displayed in a Web 2.0 tag cloud.
- **Flags** – Enables students to identify information in any file for reference later when they are studying for a test or preparing an assignment.
- **Search function** – Offers students quick access to information by allowing them to search by keywords or phrases.

Learn anywhere

- **SMART Notebook SE bracelet** – Allows students to take SMART Notebook SE anywhere. The software is loaded onto a green or blue USB bracelet that contains a 2 GB storage capacity for files and multimedia content. The bracelet automatically runs the software and saves all the files, ensuring no files are left behind after the bracelet is disconnected from the student's computer or mobile device.
- **Automatic file back up** – Provides scheduled back up of all data files on the USB key. Students can choose where the files are saved.

Content and resources

- **SMART Notebook Gallery** – Includes thousands of copyright-cleared images, backgrounds and multimedia files for use in developing reports, presentations and other materials. Students can also add their own images, and audio and video files.

System requirements

Windows® operating system

Pentium® II 450 MHz processor • 256 MB of RAM (512 MB recommended) • 215 MB of free hard disk space for minimum installation (875 MB for full installation with Gallery content) • Windows XP or Windows Vista® operating system • Internet Explorer® Internet browser 6.0 or later • Adobe® Flash® player 8

Requirements for SMART Video Player

Pentium II 450 MHz processor (700 MHz or faster recommended) • Windows XP operating system or later • Microsoft® DirectX® application programming interface 8.1 or later

PDA

Windows Mobile® 5 software or Windows Mobile 6 software • ARM-based processor at 500 MHz • 3 MB free storage space for installation • 64 MB of RAM • 320x240 or 640x480 resolution display with 16-bit color • Adobe Flash player 7 for Pocket PC
